IFAT Delhi 2026 - The Vision

Every great movement begins with a reason. For almost 60 years, IFAT has been the global stage where humanity's biggest environmental questions find practical, scalable answers. It's not just about showcasing machinery or exchanging cards. It's about asking — and answering — **why we must change**.

In India, that why has never been more urgent. As cities expand, industries grow, and our climate shifts, the need for cleaner water, efficient waste systems, and breathable air becomes existential. That's why IFAT came to Mumbai over a decade ago — and that's why it's now coming to Delhi.

Over 11 successful editions, the Mumbai chapter has grown into one of the country's largest and most influential trade fair for environmental solutions, catalysing change for municipalities, industries, and technology providers alike.

As the environmental landscape matures and regional demand deepens, IFAT India now expands to the national capital. **While the Mumbai edition continues to thrive, April 2026 will mark the debut of IFAT Delhi** — an extension that brings the event closer to the epicentre of policy, governance, and North India's industrial and infrastructural ecosystems.

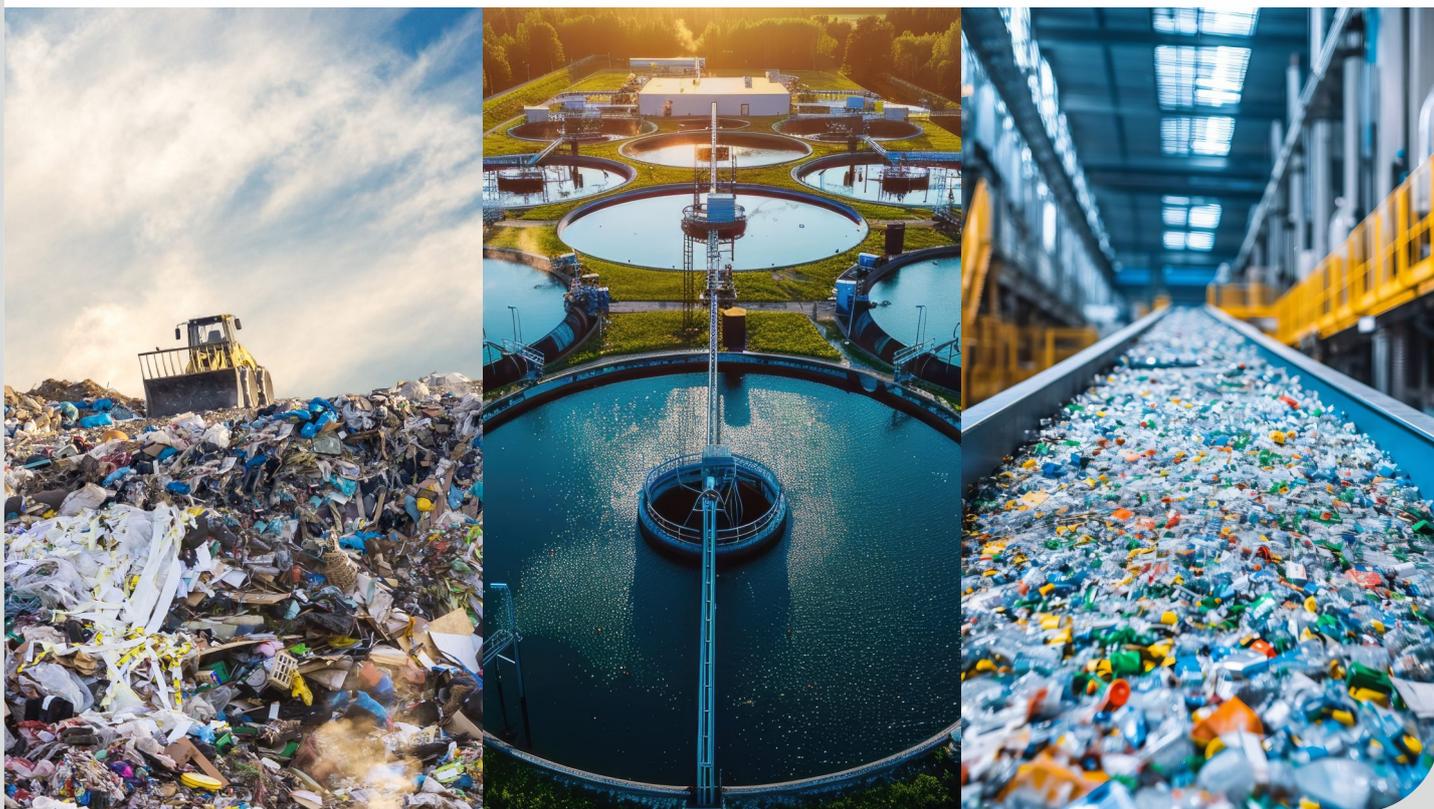

Delivering Strategic Value Through Proximity and Purpose

Policy-Proximate, Industry-Relevant

IFAT Delhi is uniquely positioned within arm's reach of India's most influential ministries—including MoHUA, MoEFCC, MNRE, and the Ministry of Jal Shakti. This proximity ensures that exhibitors and stakeholders are directly connected to the country's regulatory heartbeat, enabling swift policy dialogues, funding visibility, and deeper institutional engagement.

A Convergence of Macro Trends

India's environmental roadmap is intensifying through bold missions like the Jal Jeevan Mission, Swachh Bharat 2.0, Gati Shakti infrastructure expansion, and the national commitment to achieve Net Zero by 2070. IFAT Delhi acts as a convergence point where these policy ambitions intersect with private-sector innovation, offering a live platform for collaboration, investment, and solution deployment.

Key Highlights: IFAT Delhi 2026

Program Overview - A 3-Pillar Platform for Exhibitor Success

At IFAT Delhi 2026, exhibitors don't just get booth space—they gain access to a 360-degree business ecosystem designed to maximize visibility, foster partnerships, and accelerate commercial outcomes. The program is built around three powerful pillars:

1. The Technical Exhibition – Showcase of Scalable Solutions

This is where exhibitors bring their technologies to life. IFAT Delhi's exhibition zones are designed for sectoral clarity and cross-sectoral integration, enabling meaningful engagement with buyers.

Solid Waste

- Municipal Solid Waste
- Recycling Technologies
- Waste Automation
- Organic Waste

Air Pollution

- Air Monitoring
- Pollution Control Equipment
- Catalytic Converters
- Emission Concentrators

Water Pollution

- Wastewater Treatment
- Sewage Treatment
- Effluent Treatment
- Sludge Management

Other Areas

- Waste to Wealth
- Biogas
- Composting Solutions
- Incineration Solutions

2. The Technical Conference – Where Ideas Meet Policy

High-level thought leadership meets practical dialogue in this multi-track, cross-disciplinary forum.

Highlights

- Keynote speeches from government ministries and industries leaders
- Panel discussions on policy frameworks and technological innovations
- Case study presentations by Urban Local Bodies (ULBs), and sessions on waste management strategies for small cities
- Potential platform for strategic alliances: joint ventures, collaborations, and partnerships.

Focused Areas

Biofuels & Biogas

Water and Waste Water Treatment

Solid Waste Management & Recycling Technologies

3. The Buyer–Seller Forum – B2B Matchmaking That Works

More than networking, this is targeted commerce. The Buyer–Seller Forum brings precision to B2B matchmaking.

Structure:

- Pre-qualified buyer pools (government, infra developers, industrial ESG leads)
- Intelligence-based pairing engine
- Facilitated, time-bound one-on-one meetings

Exhibitor Profile - Industry Segments

Solution providers from key areas displaying the latest innovations, smart technologies, and sustainable solutions

- Water and wastewater treatment, Smart water technologies
- Sewage and effluent treatment, sludge management
- Government initiatives for environment protection
- Solid waste management (plastics, organics, construction and debris, e-waste, tyre & rubber, textiles, etc.)
- Waste to Wealth: upcycling and recycling solutions
- Waste to Energy: Incineration, biogas, composting, and pyrolysis technologies.
- Biodegradable and compostable products
- Waste automation: IOT based and digital solutions for waste management
- Recycling technologies, equipment, machinery, sorting & segregation solutions

Visitor Profile - Industry Segments

IFAT Delhi aims to invite potential visitors from a wide spectrum of industry segments:

- Ministries and Government Bodies
- Municipalities, City Development and Smart City Authorities
- Cement
- Chemicals and Fertilizers
- Fast-moving consumer goods (FMCG)
- Infrastructure
- Manufacturing Industries
- Paper & Packaging
- Medical and Pharmaceuticals
- Recycling industry (plastics, textiles, e-waste, C&D waste, etc.)
- Renewable Energy
- Science & Technology
- Textiles
- Pulp and Paper
- Automotive
- Trade Associations, Media and Publications
